

LEONEL GALLO *"Tolei"*

TECHNICAL SUPPORT ANALYST • SQL SERVER & .NET DEVELOPER

Buenos Aires, Argentina | leord.gallo@gmail.com | tolei.dev | linkedin.com/in/l-gallo | github.com/soytolei

PROFESSIONAL SUMMARY

Technical support analyst with 6 years of hands-on experience in SQL Server (including SSIS) across enterprise and high-availability gaming environments. Currently at Thomson Reuters, providing specialized Bejerman support: installations, incident resolution, and production database administration (backups, T-SQL, diagnostic traces). I build in-house tools in C#, .NET, ASP.NET Core, and PowerShell to automate repetitive help-desk tasks, cutting resolution times and standardizing support processes. Proven track record in production troubleshooting, database administration (DBA), VIP user support, and effective communication with operations teams and clients.

TECHNICAL SKILLS

Databases: SQL Server, T-SQL, SSMS, SSIS, MySQL, backup administration, query tuning, error diagnostics

Development: C#, .NET, WinForms, ASP.NET Core 9, JavaScript, REST APIs, Python, PowerShell 5.1

Infrastructure: Windows Server, server administration, monitoring and uptime

Tools / AI: AI-assisted error diagnostics, support process automation

PROFESSIONAL SKILLS

System installation and configuration • Production troubleshooting and support • User support and assistance • Incident management and documentation • Cross-team communication with operations • Teamwork • Case tracking and organization

PROFESSIONAL EXPERIENCE

Technical Support Analyst — Thomson Reuters

2023 — Present

- Provide specialized Bejerman technical support to companies and accounting firms, resolving incidents, installations, and technical inquiries directly with clients.
- Administer production SQL Server databases: backup management, T-SQL script execution and optimization, and trace analysis for error diagnostics.
- Design, develop, and maintain ST2, the in-house tool suite used daily by the help-desk team, improving the department's operational efficiency.

DBA & IT Support — 9z • Globant

2020 — 2023

- Administered SQL databases and infrastructure servers for a high-traffic competitive gaming platform.
- Managed VIP user accounts, ensuring continuous monitoring and high service availability.
- Coordinated with the operations team in high-load, mission-critical environments.

Data Entry Specialist — GMS SA

2020 — 2023

- Performed high-precision data entry and validation on operational databases.
- Controlled data consistency, ensuring record integrity.

Data Entry — Brink's Argentina

Apr. 2019 — Jan. 2020

- Managed the entry and control of operational documentation.
- Validated records and reconciled information across data sources.

FEATURED PROJECTS

ST2 WEB — *ASP.NET Core 9 · JavaScript · REST · st2.tolei.dev*

- Web-based support application with automated worksheets, Client Portal, THOM module, and AI Platform; evolved from a desktop executable into a fully web-based solution.

ST2 — SQL Tools — *C# · WinForms · T-SQL · AI*

- Desktop suite for backup and restore of Bejerman databases, scheduled backups, a script executor with automatic safety backup, and a Profiler-style trace with AI-assisted error diagnostics.

ST2.BAT — Bejerman Maintenance — *PowerShell 5.1*

- Field console rewritten in PowerShell for technical worksheets, component logging, and installation diagnostics, delivered as a .bat executable.

Note: ST2 tools are personal initiatives and do not represent official Thomson Reuters products.
