Escuela Normal Superior Antonio Mentruyt

2005 — 2008 · High School
Diploma, Social Sciences

LANGUAGES

English — intermediate
Fluent reading & conversation

Technical support analyst with experience in enterprise and gaming environments. Currently at Thomson Reuters providing Bejerman support (SQL Server, installs, queries). I build personal tools in .NET and PowerShell to automate repetitive help-desk tasks.

EXPERIENCE

Technical Support Analyst

2023 — present

Thomson Reuters

- Bejerman technical support for companies and accounting firms: incidents, installs and queries.
- SQL Server in production: databases, backups, scripts and traces.
- Design and upkeep of ST2, the suite the help desk uses every day.

DBA & IT Support

2020 — 2023

9z · Globant

- SQL and servers for a competitive gaming platform.
- VIP users, monitoring and availability.
- Coordination with ops in high-load environments.

Data Entry Specialist

2020 — 2023

GMS SA

- Data entry and validation with high accuracy.
- Consistency control in operational databases.

Data Entry

Apr 2019 — Jan 2020

Brink's Argentina

- Loading and control of operational documentation.
- Record validation and information reconciliation.

SELECTED PROJECTS

ST2 WEB — ASP.NET Core 9 · JavaScript · REST

Help-desk web app: automatic case sheets, Portal Cliente, THOM and AI Platform. Started as a desktop .exe; now runs in the browser. st2.tolei.dev

ST2 — SQL Tools — C# · WinForms · T-SQL · AI

Bejerman database backup and restore, scheduled backups, a SQL script runner with safety backups, and a Profiler-style trace with AI-powered error diagnosis.

ST2.BAT — Bejerman Maintenance — PowerShell 5.1

Field console rewritten in PowerShell: technical worksheet, component registration and install diagnostics. Shipped as a .bat.

ST2 tools are personal initiatives and do not represent official Thomson Reuters products.
